COUNTY OF SANTA BARBARA

Planning and Development

www.sbcountyplanning.org

Development Plan

A Development Plan (DVP) allows for discretionary review of projects allowed by right within their respective zoning districts which, because of type, scale, or location require comprehensive review.

THIS PACKAGE CONTAINS

- ✓ SUBMITTAL REQUIREMENTS
- ✓ APPLICATION FORM

AND, IF ✓'D, ALSO CONTAINS

- AGREEMENT FOR PAYMENT OF PROCESSING FEES
[Click to download Agreement to Pay form](#)
- PLAN AND MAP REQUIREMENTS
[Click to download Site Plan and Topographical Map Requirements](#)
- AGRICULTURAL ACTIVITIES SUPPLEMENT
[Click to download Agricultural Activities Supplement form](#)
- WINERIES SUPPLEMENTAL INFORMATION FORM
[Click to download Winery Supplemental Information form](#)
- RESIDENTIAL WATER SUPPLEMENT FORM
[Click to download Residential Water Authorization Supplement Form](#)
- WATER EFFICIENT LANDSCAPE ORDINANCE SUPPLEMENT FORM
[Click to download Water Efficient Landscape Ordinance Supplement Form](#)
- PERMIT COMPLIANCE APPLICATION
[Click to download Permit Compliance Application](#)
- ENERGY DIVISION SUPPLEMENT
[Click to download Oil and Gas Application](#)
- GREENHOUSE SUPPLEMENT
[Click to download Greenhouse Supplemental Questionnaire form](#)
- MISSION CANYON SUPPLEMENT
[Click to download Mission Canyon Area Supplement Information](#)
- ORDINANCE 661 INFORMATION

SUBMITTAL REQUIREMENTS FOR DEVELOPMENT PLANS

If this application is for an oil/gas or energy project, please contact the Energy Division of Planning and Development - 568-2000 - for additional submittal requirements.

Military Land Use Compatibility Planning Requirements

Is the site located in an area with any military uses/issues? Yes No

Please review the website to determine applicability. <http://cmluca.projects.atlas.ca.gov/>. This requirement applies to all General Plan Actions and Amendments, and Development Projects that meet one or more of the following conditions:

- 1) Is located within 1,000 feet of a military installation,
- 2) Is located within special use airspace, or
- 3) Is located beneath a low-level flight path

Copy of report attached? Yes No

Cities Sphere of Influence

Is the site within a city sphere of influence?¹ Yes No

If yes, which city? _____

X 12 Copies of completed application form and any applicable supplements (Housing, Agricultural, etc.)
(if the parcel is currently under AG Preserve Contract, submit 7 additional copies)

X 12 Copies of the Site Plan
[Click to download Site Plan and Topographical Map Requirements](#)

X 15 Copies of the Topographic Map
[Click to download Site Plan and Topographical Map Requirements](#)

___ 12 Sets of preliminary building elevations, including building height(s) and other physical dimensions drawn in graphic scale

___ 3 Copies of a preliminary/conceptual landscape plan

Indicate the acreage/square footage of the following:

- drought tolerant areas
- non-drought tolerant areas
- non-vegetative areas (bark, granite, stone, etc.)

X 2 Proposed grading and drainage plans showing:

- cut and fill calculations
- existing and proposed contour lines
- methods of conveying water off the site.

___ 1 Stormwater Control Plan for Regulated Projects (See Section V)

___ 3 Copies each: (refer to Application form)

___ existing hydrologic studies

___ water well driller's reports

Aug 18, 2017 4:17 PM (GMT-07:00)
10.69.71.63

Confidential

¹ If additional information is needed regarding location of a City's Sphere of Influence, please contact our zoning information counter.
Updated by FTC 112315

Planning/SBC-1_0000002

- well pump test reports
- water quality analysis
- percolation tests
- drywell performance tests

3 Copies of 10 year water use data: (refer to Application form)

- District/Company meter records for the past 10 years
 - pumpage records for the past 10 years
- If ten year history is not available, provide available data. History of water use on the property measured in acre feet per year for the preceding 10 years, when available**

2 Copies of an 8 1/2" x 11" vicinity map showing project location with respect to identifiable landmarks, roadways, etc.

2 Copy of the site plan reduced to 8 1/2" x 11"

2 Sets of photos taken from three vantage points:

- close-up
- mid-field
- entire project site.

NO BLACK AND WHITE XEROX COPIES

The following is also required:

- mount the photos on heavy 8 1/2" x 11" paper
- orient the viewer by direction ("looking northwest from...")
- note any landmarks

1 Copy of the letter sent to each utility company requesting submission of utility easement requirements to P&D.

1 Copy of an Intent to Serve or can/will serve letter from an existing water company or district requesting approval for connection. (Developer must furnish the maps for their review).
Application cannot be deemed complete without intent to serve or can and will serve letter

1 Copy of a can/will serve letter from an existing sanitary company or district requesting approval for connection. (Developer must furnish the maps for their review).

1 Aerial photo(s) of the property and surrounding parcels, when available

1 For properties in Agricultural Preserve, a list of proposed parcels and their estimated dates of transfer of ownership.

1 Letter of Authorization from all owners noted in the title report if the subdivider and owner are not the same. Full addresses of all owners must be on the map or Letter of Authorization.
[Click to download Authorization of Agent form](#)

1 Title Report must be less than 60 days old.

2 If available, copies of any existing special studies or reports such as archaeological and historical assessments, traffic studies, marketing studies, employee data and noise studies.²

Aug 18, 2017 4:17 PM(GMT-07:00)

² May remain confidential (not a part of the public case file) if requested by the applicant.

For all questions below, attach additional sheets if necessary, referencing the section and question number. Please fill in every blank. Use "N/A" where question is not applicable.

II. PROJECT DESCRIPTION: Please use the space below or type on a separate sheet and attach to the front of your application a complete description of your request including the permit/decision requested, location, setting, and purpose of the project.

*EXAMPLE: We are requesting a major Conditional Use Permit for a church in the existing building at the corner of ____ and _____. The church would serve a congregation of _____, with services on ____ and _____, classes on ____ and _____ and would include a preschool which would operate on weekdays from 6:30 a.m. to 7:00 p.m. serving a maximum of 50 children ages ____ to _____. A playground is also proposed at the NE corner of the building site. No signs are proposed at this time. One tree will be removed at the SW corner to make room for improvements for parking. The parking area will consist of 100 spaces and will be screened with a landscaped berm. Include parking, grading, storm water drainage, trees fencing, walls, screening and any other details which help describe the project in full. If your project has the potential to impact storm water quality, describe measures that will be incorporated into the project description to minimize/eliminate the impacts.**

Please refer to Attachment A.4. _____

Plains2017SBC-1_0000006

III. GRADING: Will there be any grading associated with the project? Y N

(NOTE: For proposed access drives over 12% grade, a clearance letter from the Fire Dept. will be required)

CUT See A.4 & B.5 AMOUNT TO BE EXPORTED See A.4 & B.5

FILL See A.4 & B.5 AMOUNT TO BE IMPORTED See A.4 & B.5

MAXIMUM VERTICAL HEIGHT OF CUT SLOPES See A.4 & B.5

MAXIMUM VERTICAL HEIGHT OF FILL SLOPES See A.4 & B.5

MAXIMUM HEIGHT OF ANY PROPOSED RETAINING WALL(S) 4 ft.

TOTAL AREA DISTURBED BY GRADING (sq. ft. or acres) Temporary disturbance within SBCo includes approximately 825.8 acres. Grading disturbance associated with permanent facilities within SBCo includes approximately 11.72 acres.

What is the address of the pick-up/deposit site for any excess cut/fill?

All material will be stockpiled on site along the pipeline route and used to backfill the trench where feasible.

Excess soil/material will be disposed offsite as appropriate in compliance with applicable regulations.

Specify the proposed truck haul route to/from this location.

Access routes vary.

IV. SITE INFORMATION

A. Is this property under an Agricultural Preserve Contract? Y N See Attachment A.5.

B. Describe any unstable soil areas on the site.

There are no known unstable soils within the pipeline corridor.

C. Name and describe any year round or seasonal creeks, ponds, drainage courses or other water bodies. How is runoff currently conveyed from the site?

The pipeline corridor intersects 77 seasonal creeks, drainages, and rivers (Santa Ynez River, Sisquoc River, and Cuyama River). Please refer to Attachment C.1 for a Biological Assessment discussing creek crossings.

D. Has there ever been flooding on the site? Y N

If yes, state the year and describe the effect on the project site.

E. Describe any proposed drainage and/or flood control measures. How will storm water be conveyed across and from the site? Where will storm water discharge?

The proposed pipeline is located below grade, therefore no drainage improvements are proposed. Impermeable surfaces at newly proposed valve and/or pump stations will be limited to small equipment pads and stormwater will be allowed to percolate or evaporate.

10.69.71.63
Confidential

F. Will the project require the removal of any trees? Y N
If so, please list them here as requested. Attach additional sheets as necessary.

Type	Diameter (at 4' height)	Height
<u>Please refer to Attachment C.1 for the Biological Assessment which identifies trees for removal</u>		

Explain why it is necessary to remove these trees.

See above.

G. Describe any noise sources that currently affect the site.
There are several existing compressors, pumps, and emergency generators within the existing pump stations. Additional emergency generators may be added at each gate valve station.

H. Are there any prehistoric or historic archaeological sites on the property or on neighboring parcels?
 Y N Unknown
If yes, describe. Please refer to Attachment C.2 for a Cultural Resources Report.

I. Describe all third party property interests (such as easements, leases, licenses, rights-of-way, fee ownerships or water sharing agreements) affecting the project site, provision of public utilities to the site or drainage off the site.
The existing pipelines are located within right-of-way easements where required, all such easements would be modified as necessary to facilitate the new pipeline project.

J. Have you incorporated any measures into your project to mitigate or reduce potential environmental impacts? Y N Unknown If so, list them here. (Examples include tree preservation plans, creek restoration plans, and open space easements.)
Please refer to Attachment A.4.

V. STORM WATER MANAGEMENT AND APPLICATION OF LOW IMPACT DEVELOPMENT FEATURES

Is the project located in the NPDES Permit Area²? Y N Undetermined

If Yes and 2,500 square feet or more of new or replaced impervious area, the project shall comply with the following:

Tier 1. If the project is 2,500 square feet or more of new or replaced impervious area, submit a *Stormwater Control Plan for Small (Tier 1) Projects*¹ with this application that identifies Low Impact Development measures incorporated into the project design, such as:

- Limit disturbance of natural drainage features
- Limit clearing, grading, and soil compaction
- Minimize impervious surfaces

¹ See www.sbprojectcleanwater.org under "Development" for map of the NPDES Permit Area, Stormwater Technical Guide, Stormwater Control Plan template, Stormwater Control Plan for Small (Tier-1) Projects, and a definition of Low Impact Development.

- Minimize runoff by dispersing runoff to landscape or using permeable pavements

Tier 2. If the project is 5,000 square feet or more of new or replaced "net impervious" area (not Single Family Dwelling), or if the project is Single Family Dwelling with 15,000 square feet or more of new or replaced "net impervious" area, submit a *Stormwater Control Plan* with this application that identifies 1) Low Impact Development measures incorporated into the project design and 2) stormwater quality treatment measures. ["Net impervious" is defined as the sum of new and replaced impervious surface area minus any reduction in impervious, such as new landscaped area. It is an incentive for redevelopment projects to increase pervious area. "Net impervious" is the same as new impervious for new development.]

Tier 3. If the project is 15,000 square feet or more of new or replaced impervious area, submit a *Stormwater Control Plan* with this application that identifies above requirements and also identifies retention of runoff for events up to the 95th percentile rainfall.

If No, the project is not located in the NPDES Permit Area, but is a regulated project, the project shall comply with the following:

Regulated Project:

1. Residential subdivision developments with 10 or more dwelling units;
2. Commercial development of 0.5 acres or greater;
3. Parking lots of 5,000 square feet or more or have 25 or more parking spaces and are potentially exposed to storm water runoff;
4. Automotive repair shops;
5. Retail gasoline outlets;
6. Restaurants, and
7. Any new development or redevelopment where imperviousness exceeds one acre.

Water Quality: Submit a *Stormwater Control Plan* with this application that identifies measures to reduce and remove pollutants from storm water runoff. The *Stormwater Control Plan* will follow the Tier 2 requirements described in the Stormwater Technical Guide, and identify storm water treatment, source control, and LID⁴ measures.

VI. ACCESS

- A. Describe the existing access road(s) to the site. Include road widths, shoulders, and type of surface material.
Various public and private roads including but not limited to Highway 101, Highway 1, Highway 246, and other local roads.
- B. Does property front on a public street? Y N
 Is access to be taken from this public street? Y N
 Name of public street: See above.
- C. Will the proposed access utilize an easement across neighboring property? Y* N
 *Submit documentation which supports the applicant's use of this easement.
- D. Describe proposed construction equipment access Construction equipment will access project areas using the roads described above.

⁴ Low Impact Development is a design approach that minimizes or eliminates pollutants in storm water through natural processes and maintains pre-development hydrologic characteristics, such as flow patterns, onsite retention, and recharge rates. For examples and design guidance see <http://www.sbprojectcleanwater.org>.
 Updated by FTC 112315

VII.DEVELOPMENT AND USE

A. Existing: Describe the existing structures and/or improvements on the site.

Use	Size (sq ft)	Height	# of Dwelling Units
<u>Pipeline Corridor</u>	<u>72.5 Miles</u>	<u>N/A</u>	<u>0</u>
<u>Valve Stations (5)</u>	<u>0.21 Acres</u>	<u>8 ft</u>	<u>0</u>
<u>Las Flores Pump Station</u>	<u>0.44 Acres</u>	<u>N/A</u>	<u>0</u>
<u>Gaviota Pump Station</u>	<u>0.86 Acres</u>	<u>N/A</u>	<u>0</u>
<u>Sisquoc Pump Station</u>	<u>2.53 Acres</u>	<u>N/A</u>	<u>0</u>

B. Proposed: Describe the proposed structures and/or improvements.

Use	Size (sq ft)	Height	# of Dwelling Units
<u>Valve Stations (23)</u>	<u>4.75 Acres</u>	<u>8 ft</u>	<u>0</u>
<u>Sisquoc Pump Station</u>	<u>7.00 Acres</u>	<u>48 ft</u>	<u>0</u>

C. Will any structures be demolished or removed? No. If so, please list them here as requested.

Current Use	Historic Use	Age	Rental Price (if rented)
<u>N/A</u>	<u></u>	<u></u>	<u></u>

D. Describe all other existing uses of the property.
The pipeline corridor crosses mostly vacant agricultural land utilized for cattle grazing, as well as active agricultural lands with sporadic low density residential and/or agricultural development. The proposed pipeline corridor will be routed along (but outside of) the western edge of the City of Buellton.

E. How will the project affect the existing uses of the property?
The active agricultural operations will be temporarily impacted during construction but will be returned to production upon completion of construction.

F. Describe any other historic use(s) of the property. This may include agricultural (include crop type), commercial, or residential uses.
No present change to the use of the properties is known.

G. Provide a short description of the land uses surrounding the site.
The land uses surrounding the pipeline corridor are primarily agriculture, open space, cattle grazing,

Estimate the cost of development, excluding land costs. In exceedance of \$300,000,000.00

VIII. PARCEL VALIDITY

P&D requires applications for development on vacant, unimproved property to provide clear evidence that the property is a separate legal lot. The following documents that show the subject property in its current configuration constitute acceptable evidence of a separate, legal lot: a recorded Parcel or Final Map, a recorded Official Map, a recorded Certificate of Compliance or Conditional Certificate of Compliance, an approved Lot Line Adjustment, a recorded Reversion to Acreage, a recorded Voluntary Merger or an approved Lot Split Plat.

A. Type of evidence provided to demonstrate a separate, legal lot: Parcel Map

Copy of evidence attached: Yes No

Aug 18, 2017 4:17 PM(GMT-07:00)

Reference number for evidence supplied: 71. Please refer to Attachment A.7.

IX. PUBLIC/PRIVATE SERVICES

A. WATER:

- 1. If the property is currently served by a private well, submit the following for each well: N/A
 - a. Pumpage records (electrical meter or flow meter readings) for the past 10 years
 - b. Pump test data
 - c. Location of other wells within 500 feet
 - d. Water quality analysis
 - e. Drillers report (with construction details)
 - f. Copy of applicable well sharing agreement
- 2. Does the well serve other properties? Y N
If yes, address(es): N/A
- 3. Is a well proposed? Y (N) If so, will it serve other properties? Y N
If yes, address(es): _____
- 4. If the property is currently served by a private or public water district, submit the following:
 - a. Name: N/A
- 5. Will the project require annexation to a public or private water company? Y (N)
If yes, name: N/A

B. SEWAGE DISPOSAL:

- 1. Existing: Indicate if the property is currently served by the following:

	Yes/No
a. Septic system*	<u>No</u>
b. Drywell*	<u>No</u>
c. Public sewer district	<u>No</u> If yes, name: _____

*Submit engineering details on septic tanks and dry wells, as well as calculations for leach field size, where applicable.

- 2. Proposed: Indicate what sewage disposal services are proposed as part of this project?

a. Septic system*	<u>Not Proposed</u>	
b. Drywell*	<u>Not Proposed</u>	
c. Public sewer district	<u>Not Proposed</u>	District Name: _____

*Submit percolation tests and/or drywell performance tests as applicable.

- 3. Will the project require annexation to any public sewer district? Y (N)
Name: _____

C. FIRE PROTECTION

1. Fire protection is (will be) provided by the Santa Barbara County Fire Department.
(Montecito, Summerland, S.B. County)
2. Is there an existing water main infrastructure in the vicinity? Circle one: Yes No N/A
3. How far away is the nearest standard fire hydrant? N/A feet.
4. Is a new fire hydrant proposed? Circle one: Yes No
5. If a new hydrant is proposed, what is the longest driving distance from the proposed hydrant to the proposed building(s)? N/A feet.
6. Will fire protection be provided by an on-site water storage tank? Circle one: Yes No
Tank capacity: 508,200 gallons
7. What is the driving distance from the water tank to the proposed structure(s)? 300 feet.
8. Is a fire sprinkler system proposed? Yes No Location _____
9. Describe the access for fire trucks. Include width and height clearance for access and surface material.
See Attachment C.5. All pump stations have an improved asphalt road and all valve stations will have an all weather surface such as a gravel base, etc. No height restrictions exist for fire truck access and roads are approximately 15 -20 feet wide.
10. Will hazardous materials be stored or used? Y/N List any hazardous materials which may be used or stored on the site. Crude oil will continue to be transported within the pipeline. Crude oil will be stored in a 120,000 barrel aboveground tank at the Sisquoc Pump Station.

Plains2017SBC-1_0000013

HAZARDOUS WASTE/MATERIALS

Please read and answer the following questions if, in the known history of the property, there has been any storage (above or underground) or discharge of hazardous materials or if the proposal includes storage, use or discharge of any hazardous material. Hazardous materials include pesticides, herbicides, solvents, oil, fuel, or other flammable liquids. Attach additional sheets if necessary.

Past & Present:

List any hazardous materials which have been or are currently stored/discharged/produced on the property. Describe their use, storage and method of discharge. Provide dates where possible.

Crude oil has been transported within the pipeline corridor for over thirty years. An accidental release occurred in May 2015 that has since been remediated. A pump failure in May 2014 resulted in an 11 gallon release at the Las Flores Pump Station.

If a characterization study has been prepared, please submit it with this application.

Is the project site on the County Site Mitigation list? Y N Unknown

Is the site on the CA Hazardous Waste and Substances Sites list? Y N Unknown

Proposed Project:

List any hazardous materials proposed to be stored/discharged/produced on the property. Describe the proposed use and method of storage and disposal.

Crude oil will continue to be transported within the pipeline corridor. Materials will be transported, stored, and managed in accordance with local, state, and federal guidelines.

If the proposed project involves use, storage or disposal of any hazardous materials, please contact County Fire Department at 686-8170 to determine whether additional submittals are required.

CMLUCA Report

Report for Santa Barbara County: Action Required

Area Covered: Military Installations Training Routes Special Use Air

Thank you for using the CMLUCA system.

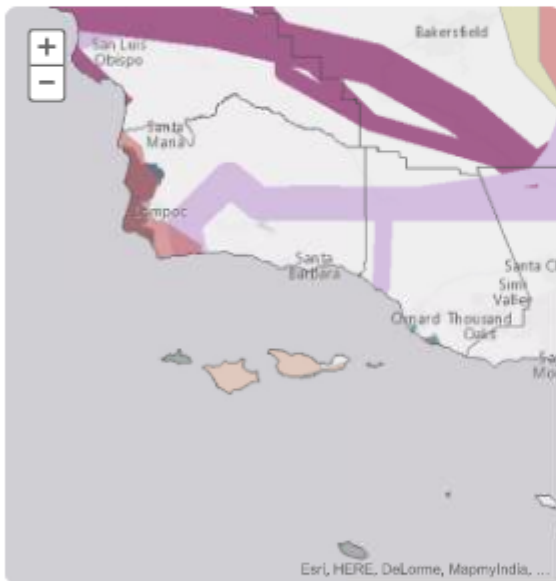

California Government Code section 65352 requires Cities and Counties which are adopting or substantially amending a general plan to refer the proposed action to the branches of the United States Armed Forces when the proposed action is within 1,000 feet of a military installation, lies within special use airspace, or is beneath a low-level flight path, as defined in Section 24193 of the Public Resources Code.

If you are receiving this report there are installations, special use airspace or low-level flight paths within your County, as depicted on the CMLUCA map. Your County should follow the protocol outlined in Gov. Code sections 65362, 65404, 65340, and 65046, as amended by SB 1462 (Kass, 2004). Specifically, your County should contact the Military Points of Contact listed on the SB 1462 Point of Contact list. The list is available here: http://nrc.ca.gov/2004/08/08/081462_POClistupdated_2011.htm

The list is also available on the Governor's Office of Planning and Research (OPR) website: <http://opr.ca.gov/mt/mt.asp>

OPR has published a Community and Military Compatibility Planning Supplement to the General Plan Guidelines, which may assist you with your planning efforts. The Supplement is available here: http://opr.ca.gov/mt/mt.asp/Military_GPC_Supplement.pdf

Please contact OPR at (916) 227-2348 or P.O. Box 3044, Sacramento, CA 95812-3044 if you have questions about your military notification requirements. Should you have questions regarding military operations within your area, contact any of the Military Point of Contact available at http://nrc.ca.gov/projects/sbca/sbca201462_POClistupdated_2011.html. If you are unsure of the Military Point of Contact, please contact the Regional Coordination Team at (916) 632-4268 or email your inquiry to 2099.Pacific.Hey@opr.ca.gov, San Diego, CA 92132.
